

OUT OF GAUGE

FOR VERY LARGE AND/OR VERY HEAVY CARGO

If your cargo doesn't fit into a standard container due to its dimensions or weight, we'll carefully load and secure it onto a collapsible flatrack or open top container.

Together with you, our experienced project team will develop a tailored solution that ensures safe and secure maritime transport; from careful planning to supervision of the entire logistics process.

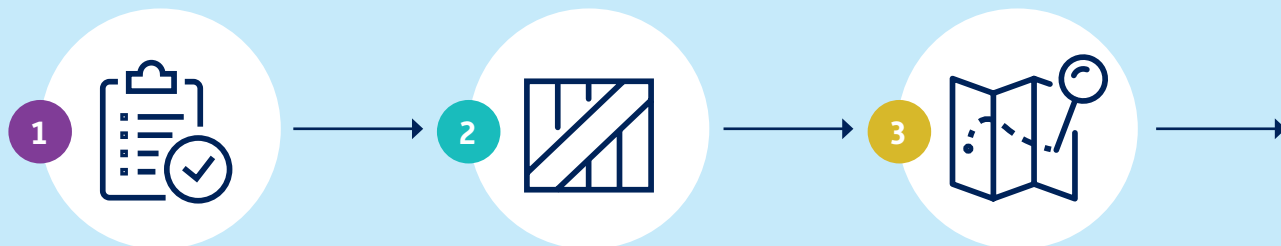

Our special equipment

We offer a variety of options for very large and/or very heavy cargo. Our experts can advise you on the best option for your cargo as dimensions may slightly vary depending on the manufacturer.

Specs (m)	Open top		Specs (m)	Flat rack	
	20ft OT	40ft OT		20ft FL	40ft FL
Length	5.90	12.03	Internal length*	5.96*	11.65*
Width	2.35	2.35	Internal width	2.40	2.35
Height	2.39	2.39	Internal height	2.29	1.96
Door opening	2.34	2.34	Length between headers	5.58	12.06
Door height	2.28	2.28	Length between corners	5.42	11.66
Volume (m ³)	33.20	65.30	Width between corners	2.06	2.22

* Subject to container serial number

THE OOG PROCESS

1 Information sharing

You provide us with all shipping details as early as possible. This includes, for example, the sensitivity of the load, access to the site and information on whether cranes are needed.

2 Detailed planning

You will receive a tailored solution that sets the framework for the OOG cargo handling.

3 Process support

We coordinate with all parties involved and keep you informed about the project status throughout.

Benefits of working with us

- Cost competitive price
- Special containers for oversized or heavy cargo
- Reliable service and capacity
- On-time delivery
- Reduced carbon footprint
- One point of contact
- Additional services upon request; e.g., pre and on carriage, expert stowage planning, loading, lashing, securing, customs clearance, documentation and permit handling and cargo cover solutions
