

TEMPERATURE CONTROLLED

-30°C TO +30°C

If your cargo needs a little extra care, we'll carefully ship your temperature sensitive or perishable cargo in our new 45ft high-cube pallet-wide refrigerated (reefer) containers.

Our refrigerated containers are perfect for transporting fruit & vegetables, frozen, fresh or processed food, fish, pharmaceuticals, liquor, and dairy products; such as: ice cream, cheese, onions, potatoes, fries or meat. We ensure the required temperature is continuously monitored and maintained throughout the entire journey.

Our special equipment

Our 45ft High-Cube Pallet-Wide refrigerated containers are all equipped with a state-of-the-art (electric) cooling system to maintain the desired temperature within a range from **-30°C to +30°C**. Our vessels are all fitted with reefer slots below deck to ensure continuous power supply on board.

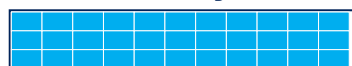

You will be able to load 26 ISO pallets or 33 Euro pallets into our 45ft reefers for maximum space utilisation.

40ft High Cube Reefer

23 Europallets

45ft Pallet-Wide High Cube Reefer

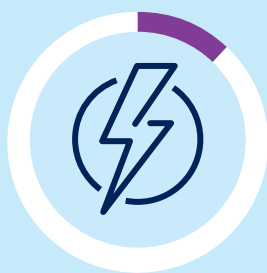

33 Europallets

	Reefer
Specs (m)	45ft HP
Length	13.30
Width	2.43

Door opening	2.44
Door height	2.54
Volume (m ³)	83.10
American pallets (#)*	26
Europallets (#)*	33

* Subject to container serial number

REDUCE YOUR CARBON FOOTPRINT

Lowest power

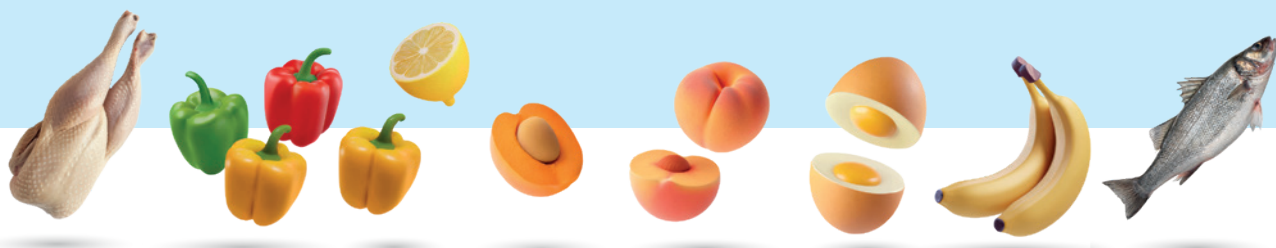

Low Global Warming Potential

Lower CO2 emissions

Our refrigerated containers are highly sustainable as the cooling system is one of the lowest power consuming machines in the industry and has a refrigerant with a low Global Warming Potential (GWP). The foaming used warrants significant lower CO2 emissions and does not harm the ozone layer.

A sustainable alternative

Multimodal transport is more sustainable as compared to conventional road transport due to very high CO2 savings.

Benefits of working with us

- Cost competitive price
- Reliable and secure equipment
- Precise temperature control
- Optimal space utilisation
- Reliable capacity
- On-time delivery
- Reduced carbon footprint
- One point of contact
