

THROUGH BILL OF LADING (TBL)

ONE CONTRACT, ONE CARRIER,
ONE SEAMLESS JOURNEY

What is a Through Bill of Lading?

A Through Bill of Lading (TBL) is a single contractual document that covers the entire multimodal transportation of goods from an international origin directly to an inland destination. It differs from a traditional Bill of Lading which only covers the shipment of goods for a single, direct leg of transport (e.g. door-to-door).

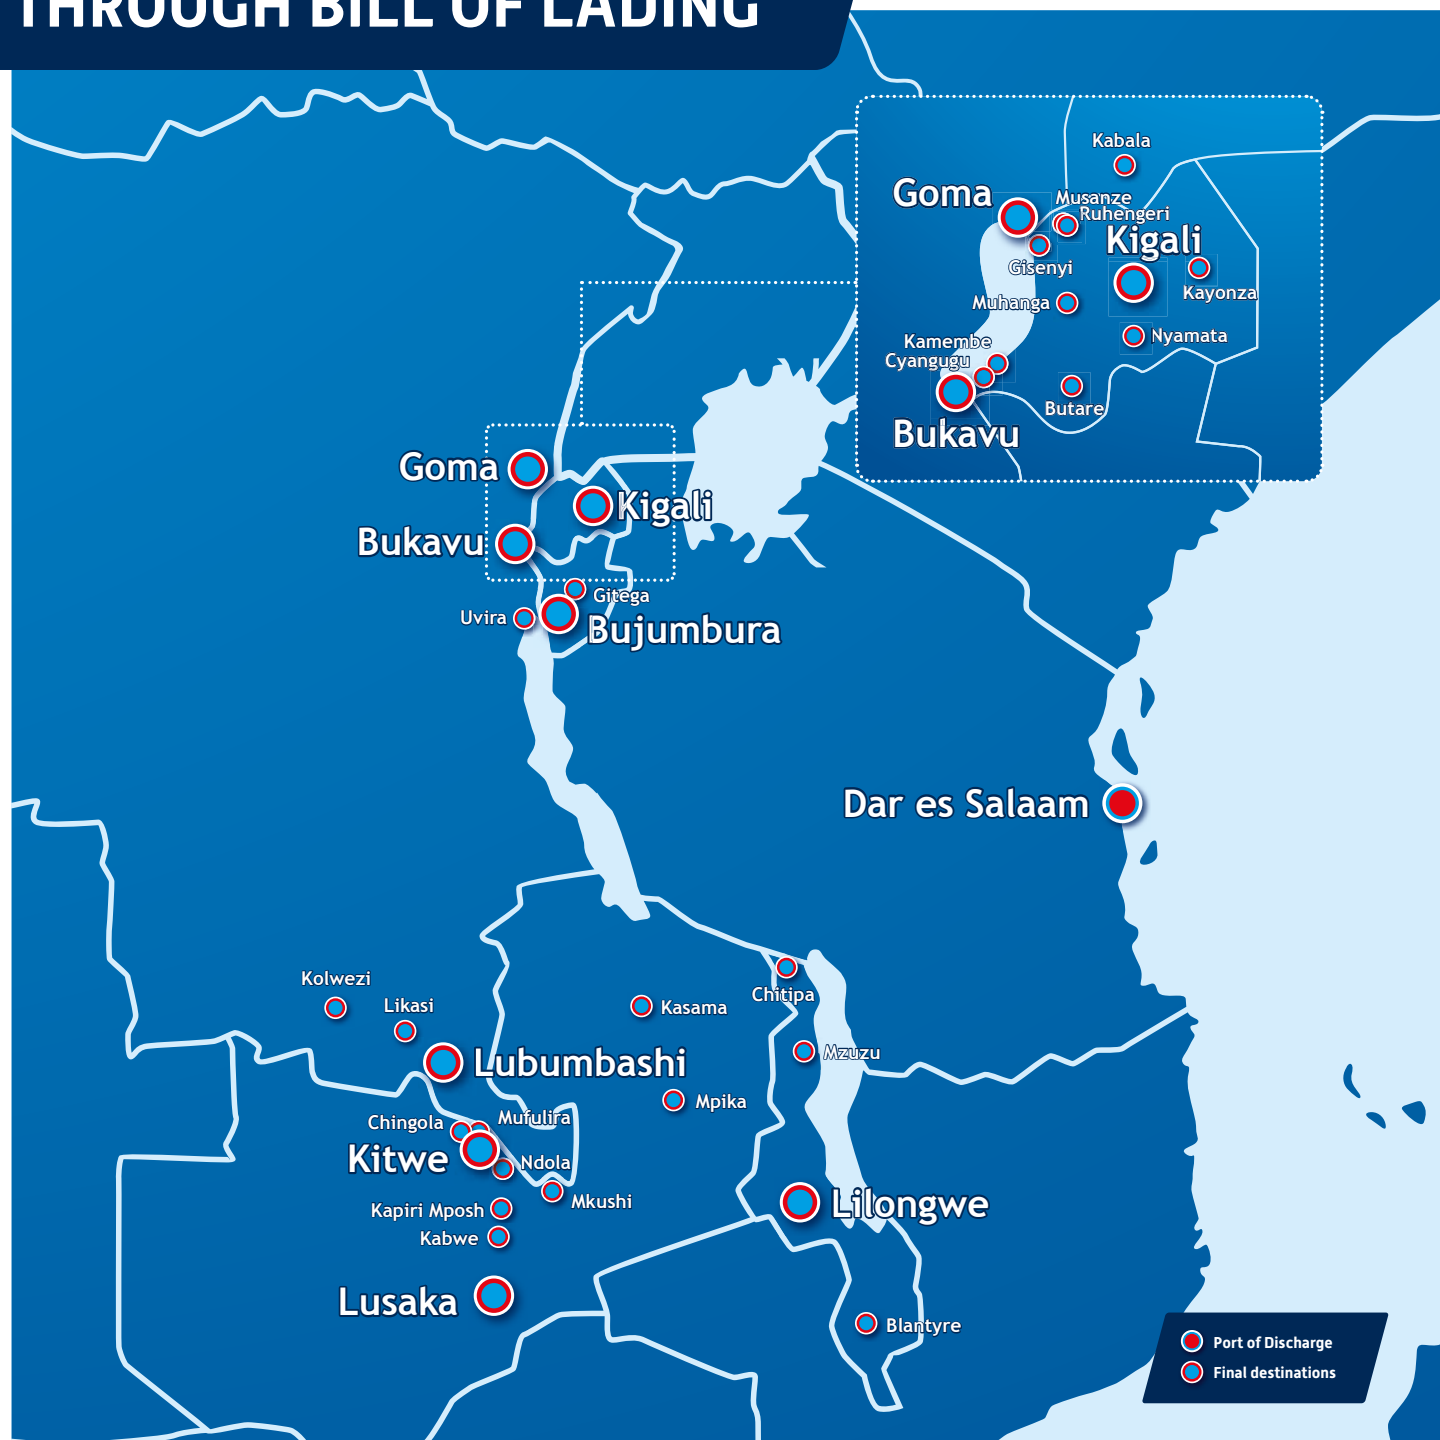

Why use a Through Bill of Lading?

In regions such as East Africa, where coastal gateways like Mombasa (Kenya) and Dar es Salaam (Tanzania) serve a vast network of landlocked nations, using a TBL offers massive advantages to shippers, importers, and freight forwarders.
